AODoubleClick

RE: Software Developer Intern

Dear Hiring Manager,

I am writing to express my strong interest in securing an internship as a Software Developer Intern at AODoubleClick. As a Bachelor of Science in Computer Science student with an enthusiasm for data analytics, I am eager to leverage my skills and knowledge to contribute to your dynamic organization.

My academic journey has equipped me with a solid foundation in computer science, enabling me to grasp complex technical concepts and adapt to the rapidly evolving landscape of technology. During my studies, I honed my programming skills, particularly in languages such as C, C++, Assembly, and Java, Python, and gained a strong understanding of algorithms, data structures, and software development methodologies.

What sets me apart is my practical experience in data science gained through the Amazon Web Services Cloud Practitioner Certificate, which I believe complements the software engineering field exceptionally well. I have successfully applied my data analysis and machine learning skills to real-world problems, allowing me to extract valuable insights from data sets and develop predictive models. This experience has cultivated a deep appreciation for the importance of clean and efficient coding, as well as the significance of teamwork in software development.

During my internship, I am committed to contributing effectively to your team and projects. I am eager to collaborate with your skilled staff body, edit and update myself to consistently be at the forefront of technology, and apply my passion for coding and problem-solving. I am confident that my knowledge of data science, combined with my solid educational background in computer science, will enable me to offer a unique perspective and add value to your initiatives.

I am eager to express how my skills align with the goals of AODoubleClick and how I can contribute to the success of your team. Please find my resume attached for your review. I look forward to the opportunity of discussing in greater detail how my hard and soft skills can add value to AODoubleClick. Thank you for considering my application.

Sincerely,
Khoa Huynh
